

STORAGE ACCOUNT

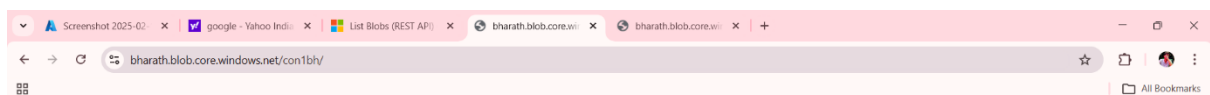

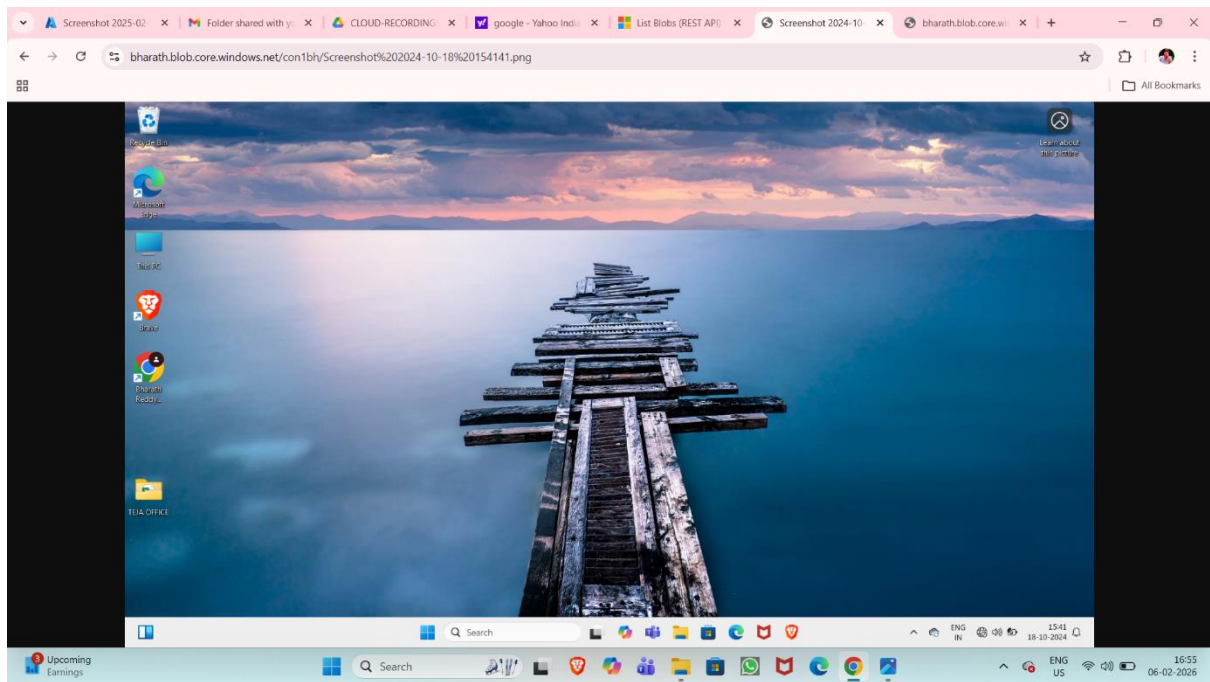

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and a user profile. The main content area displays the 'Overview' page for a Storage account named 'bharath'. The left sidebar contains a navigation menu with options like Overview, Activity log, Tags, Diagnose and solve problems, Access Control (IAM), Data migration, Events, Storage browser, Storage Mover, Partner solutions, Resource visualizer, Data storage, Security + networking, Data management, Settings, and Monitoring. The main content area is divided into sections: Essentials, Properties, Monitoring, Capabilities (7), Recommendations (0), Tutorials, and Tools + SDKs. The Essentials section shows key information about the storage account, including its location, subscription, and performance settings. The Properties section lists various services and their status, such as Hierarchical namespace, Default access tier, Blob anonymous access, Blob soft delete, Container soft delete, Versioning, Change feed, and NFS v3. The Security section shows settings for secure transfer, key access, and encryption. The Networking section shows public network access settings.

Resource group	: BH-rg	Performance	: Standard
Location	: eastus	Replication	: Locally-redundant storage (LRS)
Subscription	: Azure subscription_1	Account kind	: StorageV2 (general purpose v2)
Subscription ID	: 5d75b66d-66bf-44e0-8d7e-7e61e4b043d7	Provisioning state	: Succeeded
Disk state	: Available	Created	: 06/02/2026, 15:26:55

Service	Status	Security	Status
Hierarchical namespace	Disabled	Require secure transfer for REST API operations	Enabled
Default access tier	Hot	Storage account key access	Enabled
Blob anonymous access	Enabled	Minimum TLS version	Version 1.2
Blob soft delete	Disabled	Infrastructure encryption	Disabled
Container soft delete	Disabled	Networking	Public network access
Versioning	Disabled		Enabled
Change feed	Disabled		Public network access scope
NFS v3	Disabled		Enable from all networks

The screenshot shows the Microsoft Azure portal interface, specifically the 'Containers' page for a Storage account named 'bharath'. The left sidebar contains a navigation menu with options like Overview, Activity log, Tags, Diagnose and solve problems, Access Control (IAM), Data migration, Events, Storage browser, Storage Mover, Partner solutions, Resource visualizer, Data storage, Security + networking, Data management, Settings, and Monitoring. The main content area displays a table of containers. The table has columns for Name, Last modified, Anonymous access level, and Lease state. There are two containers listed: 'con1bh' and 'con2bh'. The 'con1bh' container is a Blob and 'con2bh' is a Container. Both are available and were last modified on 06/02/2026.

Name	Last modified	Anonymous access level	Lease state
con1bh	06/02/2026, 15:28:58	Blob	Available
con2bh	06/02/2026, 15:29:28	Container	Available

List Blobs

The `List Blobs` operation returns a list of the blobs under the specified container.

Request

You can construct the `List Blobs` request as follows. HTTPS is recommended. Replace *myaccount* with the name of your storage account.

Method	Request URI	HTTP version
GET	https://myaccount.blob.core.windows.net/mycontainer?restype=container&comp=list	HTTP/1.1

Emulated storage service URI

When you make a request against the emulated storage service, specify the emulator hostname and Azure Blob Storage port as `127.0.0.1:10000`, followed by the emulated storage account name.

Method	Request URI	HTTP version
GET	http://127.0.0.1:10000/devstoreaccount1/mycontainer?restype=container&comp=list	HTTP/1.1
