Get Started   Tutorials   Tools + SDK

Azure Traffic Manager is a DNS-based traffic load balancer. This service allows you to distribute traffic to your public facing applications across the global Azure regions. Traffic Manager also provides your public endpoints with high availability and quick responsiveness.

Azure Traffic Manager Documentation

For detail understanding of Azure Traffic Manager, refer to the documentation.

Add endpoint

Begin load balancing your traffic by adding endpoints to your Traffic Manager profile. Read more ⌕

Traffic view

Traffic View provides Traffic Manager with a view of your user bases (at a DNS resolver granularity level) and their traffic pattern. Read more ⌕

Configuration

Explore the configuration of your Traffic Manager profile.

Add or remove favorites by pressing Ctrl+Shift+F
